

Certified Professionals

Our medical staff are Certified by the Board of Nuclear Cardiology.

Tailored Care

We personalize imaging protocols to suit patients' clinical situation and body habitus.

Accessible Data

We have access to prior imaging, including catheterization information, when interpreting exams. Reports and images are widely available through Clinical Connect.

Clear Results

Our state-of-the-art SPECT, SPECT-CT, and PET scanners (St. Joseph's only) provide high-resolution images.

In Case of Emergency

We have access to urgent care and cardiac consultation for urgent patients.

Less is More

We have highly sensitive equipment that allows us to decrease imaging time to increase patient comfort while minimizing radiation dose.

You're in Good Hands

Our skilled technologists are known for attention to detail and quality care.

New Protocols = Improved Practice

We participate in cutting edge cardiac imaging research protocols, delivering these benefits to our patients.

Improving Healthcare through Accreditation

We are fully ICANL Certified, meeting the highest standards for Nuclear Cardiology imaging and reporting.

Nuclear Cardiology Services

Focused care is at the heart of what we do.
