

## Enhancing Parental Understanding of Engagement During Cognitive Behavioural Therapy for Early Onset Pediatric Obsessive Compulsive Disorder

- **Are you a parent of a child with a diagnosis of obsessive compulsive disorder who is between the ages of 5 and 12 years?**
- **Have you been involved with your child's cognitive behavioural therapy treatment?**

*If you answered **YES** to these questions you may be eligible to participate in a research study exploring parental involvement in the treatment of children with early onset obsessive compulsive disorder.*

The main *purpose* of this research study is to understand how parents are involved in their child's treatment for obsessive compulsive disorder.

Parents will be asked to complete an interview at the location and time of choice.

**Parents will receive:**

- ✓ A \$20 coffee gift card
- ✓ Voucher for free parking if required
