
Aspirin, Pain Relievers, Cold and Fever Remedies and Arthritis Medications when you have asthma, rhinitis or nasal polyps

For some people with asthma, rhinitis and nasal polyps, medications such as acetylsalicylic acid or ASA and some arthritis medications can trigger very severe asthma, rhinitis, hives, swelling and shock. If you react to one of these medications, you will probably react to all of the others as well. There are many medications and products that contain ASA. This handout names some.

- **Since new products are coming out all of the time, it is best to check with the pharmacist before using.**
- **Check the label yourself as well.**

If you react to these medications you must:

- **Avoid these medications and products at all times.**
- Let your doctor know right away if you have taken one of the medications and develop symptoms.
- Check the ingredients on the label yourself. Ask your pharmacist, doctor or other health care provider if you have questions.
- Get a medical alert bracelet or card that says you are allergic to ASA.
- Tell all of your health care providers that you are allergic to ASA.
- For pain control, **use acetaminophen**. Some products with acetaminophen are Atasol[®], Tempra[®], Tylenol[®] and Novo-Gesic[®]. Most people allergic to ASA can use acetaminophen.

Some Products that Contain ASA

217s, 217s Strong	D	P
222s	Doan's Backache Pills	Pepto-Bismol
282s, 282s Meps	Dodd's Tablets – All	Percodan
292s	Dolomine 37	Phenaphen with Codeine
692s	Dristan Extra Strength	PMS-Sulfasalazine
A	Dristan – All kinds	
AC&C		R
AC&C Extra Strength	E	Ratio-Oxycodan
Acetylsalicylic Acid	EC ASA	Relief ASA
Achrocidin	Ecotrin – All kinds	Robaxisal – All kinds
Aggrenox	Endodan
